Education

Auburn University, Auburn, AL

Bachelor of Science in Computer Science

Certificate in Artificial Intelligence

Graduation: December 2026

GPA: 3.47 / 4.0

Relevant Coursework: Data Structures & Algorithms, Software Engineering, Database Systems, Operating Systems, Computer Networks, Secure Cloud Computing.

Technical Skills

Languages: Python, Kotlin, Java, C/C++, JavaScript/TypeScript, SQL, HTML/CSS

Frameworks & Tools: VScode, React, Node.js, Next.js, Docker, Git/GitHub, Linux/Bash, REST APIs

Cloud & Platforms: AWS (S3, EC2), PostgreSQL, MongoDB, OpenStack

Experience

OCV LLC

Software Engineering Intern

Opelika, AL

May 2025 – Current

- Developed and maintained native mobile applications and web platforms for public safety and emergency services agencies, including law enforcement, fire departments, and EMA organizations.
- Collaborated within an 8-person engineering team to design, test, build, and deploy **1,500+** custom iOS, Android, and web applications.
- Engineered cross-platform solutions using **Swift** in Xcode, **Kotlin** in Android Studio, and **React** with **Node.js** in VS Code to ensure reliable and user-friendly communication for public safety.

Auburn University Recreation & Wellness Center

Operations Supervisor

Auburn, AL

May 2024 – Current

- Led and managed a team of 6 shift staff, directing daily facility operations and ensuring a safe, welcoming environment for members and guests.
- Coordinated end-to-end logistics, setup, and supervision for center-hosted events, ensuring seamless execution and guest satisfaction.

Projects

Openstack Cloud Service

Coursework Project – Multinode Openstack IaaS

May 2026 – Aug 2026

- Architected and deployed a multi-node **OpenStack** cloud infrastructure leveraging **Kolla-Ansible** for automated deployment and configuration management.
- Containerized core **OpenStack** control plane services using **Docker** to ensure isolated, resilient, and scalable service management.
- Integrated **Ceph** distributed storage to provide scalable block and object storage for hypervisor instances and multi-node cloud operations.

TaskApp

Personal Project – Python, PyQt, SQLite, CLI

Jul 2026 – Aug 2026

- Developed a cross-platform task management application providing both a UI and CLI.
- Designed a custom ORM / SQLite wrapper class to abstract database operations, enabling clean simplified query execution.
- Implemented core CRUD functionality (Create, Read, Update, Delete) allowing users to seamlessly add, edit, track, and remove tasks with titles and detailed descriptions.

Leadership & Extracurriculars

University Marching Band

Equipment & Light Crew Lead

Aug 2023 – May 2026

- Coordinated setup, testing, and distribution of specialized performance lighting hardware for 370+ band members during university game days.
