EDUCATION

Auburn University, Auburn AL	Fall 2026
Bachelor of Science in Computer Science	GPA: 3.47 / 4
Certificate in Artificial Intelligence	
National Society of Collegiate Scholars	

WORK EXPERIENCE

OCV LLC, Opelika AL	May 2025 - Current
Software Engineer Intern	
- Build, deploy, and maintain cross-platform mobile applications and responsive websites serving public safety agencies (Sheriff, Police, Fire, and EMS). - Execute end-to-end deployment pipelines to build, test, and release production applications directly to the Apple App Store and Google Play Store.	
Auburn Recreation & Wellness, Auburn AL	May 2024 - Current
Operations Supervisor	
- Oversee daily facility operations and event execution across a high-traffic wellness center, ensuring safety compliance and smooth event logistics. - Direct and mentor a team of Facility Attendants, delegating tasks, managing shift coverage, and elevating customer service standards for thousands of members.	

PROJECTS AND TEAMS

Openstack Cloud Service Project	May 2026 - Jul 2026
- Architected and deployed a multi-node private cloud cluster utilizing OpenStack and Ceph, configuring dedicated controller, compute, and storage nodes. - Automated multi-node deployment workflows using Kolla-Ansible, optimizing containerized docker service provisioning across physical infrastructure. - Diagnosed and resolved complex precheck failure states, network bridge interfaces, and container initialization dependencies across multi-node topologies.	
Auburn University Marching Band	August 2023 - August 2026
- Demonstrated high adaptability and attention to detail by learning and perfecting rapid choreography changes under tight turnarounds. - Dedicated 20+ hours weekly to rigorous outdoor rehearsals, balancing full-time academic coursework and jobs with demanding athletic performance schedules in order to perform in front of 85,000+ spectators.	
Auburn University Marching Band Light Crew	August 2024 - August 2026
- Assembled, wired, and tested custom light rigs for 380+ shakos, ensuring reliable circuit connections and battery functionality for night-game performances. - Conducted pre-performance quality control checks across all light units to guarantee 100% operational uptime during live broadcasts. - Managed the inventory, distribution, and retrieval of custom light hardware for the entire ensemble during game-day operations.	

SKILLS

Programming languages: Kotlin/Java, C++, C#, Python, JavaScript

Computer software/frameworks: Git, Github, Visual Studio Code, Node.js, Android Studio, Unity, React
